Presentation Folder

9 × 12-inch finished folder · Cover artwork · November 3, 2026

Files and panel order

The next two pages are separate exterior cover panels: front cover, then back cover. Place them on your folder production template. They are not two sides of a duplex sheet. Do not print this instruction page.

Artwork specifications

- Each cover: 9 × 12-inch TrimBox, plus ⅛-inch bleed on all sides. MediaBox/BleedBox: 9¼ × 12¼ inches.
- Tagline, service line and contact text are live text with embedded fonts. Logo artwork is native-resolution raster at approximately 619 ppi. No upsampling.
- Solid backgrounds and rules are vector artwork. The former flattened textures, sample inserts and construction labels are not included as printing artwork.

Printer production setup

Job specification from the quote: full color 4/0 on 16pt cover, two interior pockets with business-card slits. Printer to supply the dieline, impose the exterior covers, and handle pocket flaps, glue areas, folds, slits and any stock-specific allowances. Do not use the legacy interior mockup as a cutting template.

Artwork is supplied in RGB, not certified PDF/X. Apply your press/profile conversion, check navy ink coverage and trapping, and provide a folded color proof for approval before the production run.
